

How To Install a Skycoin Wallet

So you've decided on investing in the coin of the future. Well done. You have your skycoin on an exchange but how do you transfer it to your wallet? Well, first you need a skycoin wallet. This guide will walk you through the steps necessary to install, create and secure your skycoin wallet.

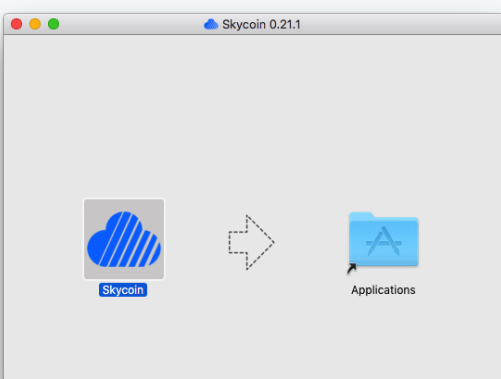

1.) First thing's first... download the skycoin wallet app from www.skycoin.net/downloads

 MacOS	Standalone		Download	.dmg
	Installer		Download	.zip
 Windows	Standalone	64bit	Download	.exe
	Installer	32bit	Download	.zip
		64bit	Download	.zip

2.) Download the correct wallet for your operating system. For the purposes of this guide it will be OSX. Once it has finished downloading open the file.

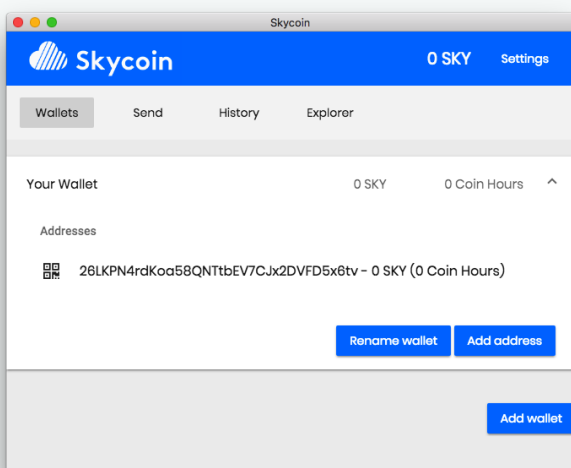

3.) Drag the Skycoin application into your applications folder.

4.) Launch the Skycoin Wallet and allow it to sync.

Syncing blocks (980/8337)

5.) Click on your wallet to see your Skycoin Address.

You are now the proud owner of your very own Skycoin Wallet. Congrats! You can now send and receive Skycoin as well as earn CoinHours! Remember though, with great power comes great responsibility....

Once you build up a sizable amount of sky you may want to secure it by backing it up as a paper wallet. A paper wallet will allow you to get your skycoin off your computer where it may be vulnerable to shady people. If your interested in this Please follow our '[How to secure your skycoin wallet](#)' guide.
